1. Introduction

Purpose

CollabSpace AI is an intelligent collaboration platform designed to centralize project management, task tracking, team collaboration, communication, file management, meetings, reporting, and artificial intelligence capabilities into a single integrated system.

The platform enables organizations and teams to manage their work efficiently while leveraging AI to provide insights, summaries, and intelligent recommendations.

2. Scope

The system shall provide the following modules:

- Authentication and Authorization
- Dashboard and Analytics
- Project Management
- Task Management
- Team Management
- File Management
- Real-Time Project Chat
- Meeting Management
- Reports and Analytics
- User Profile Management
- AI Assistant

3. Business Objectives

The objectives of CollabSpace AI are:

1. Improve collaboration among teams.
2. Centralize communication and project data.
3. Increase project visibility and transparency.
4. Improve productivity and accountability.
5. Provide intelligent insights using AI.
6. Reduce project management overhead.
7. Deliver comprehensive reporting and analytics.
8. Support scalable team collaboration.

4. Stakeholders

System Administrator

Responsible for:

- Managing users
- Managing permissions
- Managing projects
- Managing teams
- Viewing reports
- Configuring AI settings

Project Manager

Responsible for:

- Creating projects
- Managing tasks
- Assigning teams
- Scheduling meetings
- Monitoring project progress

Team Members

Responsible for:

- Managing assigned tasks
- Participating in project discussions
- Uploading files
- Joining meetings
- Viewing reports and personal statistics

5. User Roles and Permissions

Administrator

Permissions:

- Full system access

Project Manager

Permissions:

- Create projects
- Edit projects
- Manage tasks
- Assign team members
- Schedule meetings
- Generate project reports
- View project analytics

Team Member

Permissions:

- View assigned projects
- View assigned tasks
- Update task status
- Participate in project chat

User Profile Module

>

- Upload files
- Attend meetings
- View personal reports

6. Authentication Module

Sign In

Fields:

- Email

- Password

Functions:

- Login
- Remember Me
- Login with Google
- Forgot Password

Validations:

- Email is required
- Password is required

Sign Up

Fields:

- Full Name
- Email Address
- Password
- Confirm Password

Validations:

- Name is required
- Email must be unique
- Password minimum eight characters
- Password confirmation must match

Forgot Password

Flow:

1. User enters email.
2. System sends reset link.
3. User opens reset link.
4. User enters new password.
5. Password is updated successfully.

7. Dashboard Module

The dashboard shall display:

Tasks Statistics

- Pending Tasks
- In Progress Tasks
- Completed Tasks
- Completion Rate Percentage

Projects Overview

- Active Projects
- Project Status Distribution
- Project Progress Indicators

Recent Files

Display:

- File Name
- Uploaded By
- Upload Date

Teams Overview

Display:

- Team Name
- Members Count
- Active Projects Count

Upcoming Meetings

Display:

- Meeting Title
- Meeting Date
- Meeting Time
- Participants

Ask AI Widget

Capabilities:

- Project Questions
- Team Questions
- Progress Questions
- Recommendations
- Intelligent Search

8. Functional Requirements

Project Management Module

Create Project

Fields:

- Project Name
- Description
- Start Date
- Deadline
- Priority
- Status
- Teams
- Files

Project Status:

- Pending
- In Progress
- On Hold
- Completed
- Cancelled

Project Priority:

- Low
- Medium
- High
- Critical

Features:

- Create Project
- Update Project
- Delete Project
- Search Projects
- Filter Projects
- View Project Overview

Project Overview shall include:

- General Information
- Progress Percentage
- Team Members
- Tasks
- Files
- Meetings
- Chat Activity
- AI Insights

Task Management Module

Task Fields:

- Task Name
- Description
- Assigned Team
- Project
- Attachments
- Status

Task Status:

- Pending
- In Progress
- In Review
- Completed

Features:

- Create Task
- Update Task

- Delete Task
- Upload Files
- Search by Task Name
- Filter by Project
- Filter by Team
- Filter by Status

Teams Module

Teams Examples:

- Frontend Team
- Backend Team
- UI/UX Team
- QA Team
- DevOps Team
- Marketing Team

Features:

- Create Team
- Edit Team
- Delete Team
- Assign Projects
- Assign Members

Real-Time Project Chat

Requirements:

- Chat is project-based only.
- No global chat is available.
- Users can access chat only if they belong to the project.

Features:

- Send Messages
- Reply to Messages

- Edit Messages
- Delete Messages
- Mention Users
- Upload Files
- Read Receipts
- Online Indicators
- Notifications

Meetings Module

Meeting Fields:

- Title
- Description
- Date
- Start Time
- End Time
- Meeting Link
- Project
- Participants

Features:

- Create Meeting
- Invite Team Members
- Invite Members from Other Teams
- Cancel Meeting
- Reschedule Meeting
- Send Notifications

AI Meeting Summary:

- Meeting Summary
- Decisions Made
- Action Items
- Assigned Tasks
- Risks
- Next Steps

Reports Module

Reports shall include:

Project Reports:

- Total Projects
- Active Projects
- Delayed Projects
- Completed Projects
- Completion Rates

Task Reports:

- Total Tasks
- Completed Tasks
- Pending Tasks
- Productivity Statistics

Team Reports:

- Team Performance
- Workload Distribution
- Completion Rates
- Active Projects

User Reports:

- Personal Information
- Assigned Tasks
- Completed Tasks
- Uploaded Files
- Meeting Attendance
- Productivity Score
- Performance Overview

User Profile Module

Profile Information:

- Name

- Email
- Job Title
- Years of Experience
- Current Team
- Current Projects

Profile Features:

- Edit Profile
- Change Password
- View Tasks
- View Files
- View Reports
- View Performance Metrics

AI Assistant (CollabSpace AI)

The AI Assistant shall have controlled access to:

- Projects
- Tasks
- Teams
- Meetings
- Reports
- Files Metadata

Capabilities:

- Answer project-related questions
- Provide project insights
- Analyze team performance
- Recommend actions
- Generate summaries
- Perform intelligent searches
- Generate reports

Only Administrators may configure AI permissions and settings.

Non-Functional Requirements

Performance:

- Response time less than 2 seconds
- Support at least 10,000 concurrent users
- Chat latency less than 500 milliseconds

Availability:

- System uptime of 99.9%

Security:

- JWT Authentication
- Google OAuth Login
- Role-Based Access Control (RBAC)
- Password Hashing
- File Permissions
- Audit Logging

Scalability:

- Horizontal Scaling Support
- Load Balancing Support
- Cloud Deployment Ready

Backup and Recovery:

- Daily Backups
- Disaster Recovery Procedures
- Point-in-Time Recovery

Logging:

- Authentication Logs
- Project Logs
- File Logs
- Chat Logs
- Meeting Logs
- AI Activity Logs
